MetaTrader4 Trading Platform Features & Operations

Introduction to the order function

★ Market price trading

In the 'Market' or 'Chart' section, click on the product you wish to trade, 'XAU' (London Gold) or 'XAG' (London Silver). In the new 'Trading Volume' window that appears, enter the number of lots you wish to trade. The input box has numbers on both sides; '-1' and '+1' represent a reduction or increase of 1 lot, while '-0.1' and '+0.1' represent a reduction or increase of 0.1 lots. Below, you can set your stop loss and take profit levels, as well as the allowable deviation between your bid price and the quoted price. Then, select 'SELL' to sell or 'BUY' to buy, and the order will be executed. Once the order is placed, it will appear in the 'Trading' section.

Note: The minimum number of lots that can be traded in a single transaction is 0.1 lots, and there is no limit to the maximum number of lots in a single transaction.

MetaTrader4 Trading Platform Features & Operations

★ Pending orders

In the "Quotes" or "Charts" column, click on the product you want to trade "XAU" (London Gold) or "XAG" (London Silver), enter the number of lots you need to trade in the "Volume" column of the pop-up interface, there are numbers on both sides of the input box, "-1" and "+1" represent decrease and increase by 1 lot, "-0.1" and "+0.1" represent decrease and increase by 0.1 lot. Select the Pending Order type in the order type, including Buy Limit, Buy Stop, Sell Limit, and Sell Stop, and click "Next". In the pop-up new interface "Price", enter the opening price of the pending order, and click the Pending Order Type button below to create a pending order. You can also set "Stop Loss", "Take Profit" and pending order periods, and click "SELL" to sell or "BUY" to buy.

Pending orders are divided into the following 4 categories:

Buy stop: An order to buy at a price higher than the current market price. Buy limit: An order to buy at a price lower than the current market price. Sell stop: An order to sell at a price lower than the current market price. Sell limit: An order to sell at a price higher than the current market price.

Note 1: The minimum single transaction in the simulated account is 0.1 lots, and the maximum single transaction is 20 lots. The minimum single transaction in the real account is 0.1 lots, and the maximum single transaction is 20 lots.

Note 2: The London Gold order price in the real account must be at least 250 points, or \$2.50, from the current price; the London Gold order price in the simulated account must be at least 300 points, or \$3, from the current price; and the London Silver order price must be at least 20 points, or \$0.20, from the current price. When the sell/buy price of the future market equals the set order price, the system will automatically build a position.

Note 3: The platform only supports two types of transactions: buy limit (Buy limit) and sell limit (Sell limit).

MetaTrader4 Trading Platform Features & Operations

★ How to modify or delete a pending order

In the "Trade" option, long-press on the pending order you want to modify or delete. If you need to modify, you can modify the opening price, stop loss price and take profit price as needed, and click "Modify Order". If you need to delete it, just click the "Delete Order" button.

★ Stop loss and take profit

Stop-loss and take-profit are good for locking in profits and controlling risks. When you place an order, you can set the stop loss or take profit price at the same time, or you can long press the established order and select "Modify Order" to modify the stop loss price and take profit price. Click on the established market order, set the stop loss price and take profit price as needed on the new page, and click "Modify" after the setting is successful

Note: The London Gold Stop Loss and Take Profit level of the real account must be at least 250 pips away from the current price, i.e. \$2.5; The Take Profit level of the demo account must be at least 300 pips away from the current price, i.e. \$3; The London Silver Stop Loss and Take Profit level must be at least 20 pips away from the current price, which is \$0.2.

Stop Loss or Take Profit you set must differ from market price by at least 250 points. Stops processing is performed on the broker side.

MetaTrader4 Trading Platform Features & Operations

★ How to close a position

In the "Trade" option, press and hold the market order you want to close, and

click the "Buy/Sell by Market" button below on the new page.

Note: When the effective ratio of the MT4 platform reaches 20%, the system will force the liquidation, (when the margin is less than 20%, the system will first close the single with the most losses in the client's account to protect the interests of the client's account) The MT4 demo account take-profit and stop-loss is 3 pips from the market price. The real account is 2.5 pips off the market. London silver is accepted at a distance of 20 cents from the market price = \$0.02

Chart features and settings

★ How to add and remove technical indicators

Click the icon in "Chart description of the settings page. Click description of the button, and click the required technical indicators in the common ones that appear To add the technical indicators, click "Complete" after setting to add them to the chart.
